TRAVEL

IN THE EARLY '80s, anyone who did a triathlon was called nuts. In the '90s, anyone who does an adventure race is called cool. Adventure racing is physically and mentally challenging. It's about teamwork, endurance, and using duct tape on your blisters. It's about getting lost at night, then finding your way again. It's about finishing the race together.

"The Adventure Racing Travel catalog is a cross between Patagonia and The Sharper Image."
